"The collection of coins has not only become an infatuating and engrossing pursuit among thousands of persons of all ages and either sex, but out of it has grown up an extensive trade, furnishing the means of livelihood to numerous individuals in all our large cities. Prices have risen a hundred fold, in some cases almost incalculably; unreasonably; and speculation has been rife...

(from The American Journal of Numismatics, Vol. 1, No. 1, May 1866.)

OUR TERMS OF SALE

1. All coins are guaranteed genuine. I will replace or issue a refund for any coin found not to be genuine. This is a lifetime guarantee. Over ten years of business I have never had to make good on this promise. But I make it anyway for your protection.
2. All attributions are guaranteed correct. Also a lifetime guarantee. I will issue a refund or if available provide a replacement for any coin found to be mis-attributed.
3. A full thirty day return privilege is allowed on all purchases. Returns may be made for any reason, or no reason. My business depends on attracting repeat customers. It does neither of us any good for you to keep a coin with which you are not completely satisfied. I am confident that the overall quality and value of the material I offer here is second to none. This does not mean that you might not order a coin that fails to satisfy your personal taste or desire. It is even possible for me to have missed a defect or to have been optimistic about the grade. It can happen. But it is not my intention. I encourage you to use the thirty days as an approval period. Feel free to show your purchases to other knowledgeable EAC members. Get a second opinion. All sales are final after the thirty day period, though I will certainly consider an extension upon reasonable request.
4. Approval service is also available to established clients. Seven days inspection is allowed on approval service at which time the coin must be returned or funds remitted. Approval sales are considered final after the seven days. Extensions are available upon request. We also accept VISA and MASTERCARD.
5. All orders are sent postpaid.
6. Strict ANA and EAC guidelines are followed in grading.

In addition to strict ANA and EAC guidelines I have introduced "value" or "net" grading into my descriptions. Sharpness or technical grade according to ANA standards is fairly easy to describe with consistency. However most old copper coins have acquired defects over time that detract from the overall desirability of the coin. I describe these defects and deduct from the technical

grade based on their presence. As an example a coin might be described: "1805 S-267 VF20 Sharpness of VF30 with smooth brown surfaces, some light pinscratches where corrosion was removed at K1 reverse." Here is a coin VF30 by ANA standards but with scratches at one o'clock on the reverse. Plainly the coin would be more desirable were the scratches not present. I describe the defects and deduct ten points from the overall grade. The first grade listed represents the net or value grade. Clearly this is an art and elements of subjectivity are inevitable. Where there is no second grade listed

It is my opinion that the net grade is the same as the sharpness grade. Perhaps not perfection but whatever marks present have been judged to be consistent with the technical grade of the coin and do not detract from the net grade. The intent is for you to have as close an idea as possible of the overall condition of the coin you may wish to purchase. No unpleasant surprises!

7. I attempt to give a rarity rating for each variety listed. These in large part reflect the current EAC rarity ratings as compiled by Jack Robinson's Copper Quotes. I also offer opinions relative to condition census ratings die state and condition rarity. These change constantly as new coins are discovered and reported. I attempt to use the latest data or information available. Still these ratings cannot be 100% accurate and remain a matter of opinion only.

Having said this I can also say with confidence that more information and more research is available on Early Copper than any other area of American Numismatics. Large Cents have been actively collected and researched for more than one hundred years. One can therefore have a high degree of confidence in the general accuracy of current information. I urge all my clients to form the numismatic library necessary to allow them to make informed judgments and purchasing decisions. It is foolish to invest money in coins if you have not already invested in the books and other sources necessary to the full enjoyment of them.

8. I have yet to meet anyone who has bought coins merely as an investment who has realized a net return upon liquidation. I have, however, met numerous serious collectors, who having formed a discriminating collection over a period of years realized a substantial profit when their collection was ultimately sold. Most collectors find that the enjoyment, education, and friendships formed as a result of their collecting pursuits have been their greatest reward. It is much easier to lose money quickly than to make money quickly in rare coins. If you are not willing to undertake the educational process necessary to make well informed decisions regarding your collection you will almost certainly lose. Coin dealers are often more than willing to give investment advice. As my good friend Jack Robinson, (who's collection did

very well for him when it was sold in 1989), likes to say. THINK ABOUT IT! When you ask a cat which canary to buy remember his first concern may not be how well it sings! There are many opportunities to do well financially in rare coins. But as with any other medium of investment, success is the result of a combination of knowledge, good timing and the ability to wait for the right time to sell. Commit yourself to the process of becoming an educated collector and you stand a good chance of success.

Chris

Welcome to my November/December price list. This is my annual Holiday catalog and you may take a 10% discount off any item listed.

I believe this is my best catalog to date. A nice group of Half Cents features several beautiful proof only issues from the Byron Reed Sale. Also, a proof 1856 copper nickel pattern. The first I have ever offered.

Among many outstanding large cents, the mint state 1793 Chain cent from the Beckwith Collection is the highlight. A nice run of 1794s is also offered along with rarities such as 1793 S-7, 1796 S-96, and 1801 NC-3. The middle and late date are well represented with many choice and scarce pieces. We have expanded our die state attributions and hope this is of help to the many die state collectors. An expanded group of Colonial coins is included. I hope to see this grow.

Our auction at the Colonial Coin Collector's Sale was a great success. Prices realized are listed at the back of this catalog. In January we will hold the sale of the Joe Dooley Collection at the Orlando FUN Convention. Look for this catalog in your mailbox by mid-December.

I will attend the FUN Convention Jan. 8-12, Long Beach, CA Feb. 19-22, Baltimore MD Mar. 5-8. Hope to see you! Have a great Christmas and Holiday season!

1835 N-14 R2 EF40 \$ 325.00

Choice lustrous light brown. Problem free and very attractive. Ex. Henry Hines-Lillian Scheer-Willard Blaisdell-Del Bland. The name of Lillian Scheer occasionally appears in the pedigree of Cents from some of the older collections. Though she was not a collector in any real sense Ms. Scheer came to be the owner of some nice early copper. In another more important if less direct way she contributed to our hobby greatly. You see Lillian Scheer was the housekeeper for Henry Hines, one of the great collectors of his time. Of his time or of any time! As Dr. Sheldon was fond of saying when it came to choice pieces "Hines had'em!". Unfortunately in the last years of his life Mr. Hines' wife took ill and much of his fortune was devoted to her care. In the end he had little other than his precious cent collection. This was slowly dispersed to pay for his wife's care and for his own expenses. During this time the day to day responsibilities of running his household fell to Ms. Scheer. Though without normal resources Mr. Hines took care prior to his own death to make provisions for Ms. Scheer's upkeep. He left to her a substantial number of coins which were sold in one group to Willard Blaisdell. As Lillian Scheer knew next to nothing about coins it may be guessed that Blaisdell had little trouble paying her well in excess of their true value without any risk of injury to her pride. The next time you hold in your hand a piece of old copper with the pedigree Hines-Scheer-Blaisdell, know that you are preceded in its possession by three remarkable people.

THE BYRON REED SALE

October 9th I attended the fabulous Byron Reed Collection Sale in New York City. It was a fascinating sale held by Christie's numismatic arm, Spink America. The sale was somewhat sparsely attended; perhaps due to Christie's limited numismatic clientele. Prices, at least for the copper, were also somewhat soft. What was fascinating, though, was the opportunity to view a collection that has been stored for close to a hundred years. There was some talk about the possible mishandling of the coins or the wisdom of entrusting a numismatic collection to a non-numismatic museum. But what caught my attention was the dramatic difference between the different types of coins. The gold coins were in nice condition overall. While the silver coins were, for whatever reason, horrible. Many were black almost to the point of looking encrusted. Many pieces appeared to be harshly cleaned and hairlined though one could hardly see through the dark tone to the surface. The copper coins, on the other hand, were largely pristine. The proofs had glittering unhairlined surfaces free of spots or other impairments. The beautiful 1793 C-4, 1794 S-21, and 1798 S-197 were in need of a brushing, but had beautiful subdued luster and showed no signs of deterioration over their 100 years of storage. For years copper collectors have been subjected to propagandizing by the "investment gurus" and other experts. It has been said that copper, being a reactive metal, is subject to spontaneous corrosion and spotting. Copper collectors are worried that their gem red cent may turn black or green. I've never seen it happen. Storage in a cotton envelope or poly bag should provide sufficient protection for any coin. A plain paper 2x2 envelope will do for most circulated coins. Have copper coins really turned colors while in PCGS or NGC holders? Of course they have. If a cent is dipped or chemically altered, the surfaces are made reactive and can spot or tone. The color of a mint "red" cent is a subdued red. Some years ago the services seem to prefer "pink" coins. As a result many coins were made "full pink" to go through the services. Some of these have since turned. As you would expect. If you learn to tell the difference between original and altered surfaces you have little to fear regarding storage of your coins. Remember, often if a coin looks too good to be true, it isn't true. The Byron Reed Sale is a testimony to the long term beauty of copper coins. Keep them away from moisture in cotton pouches or any pvc free holder and storage shouldn't be a concern.
